Trainees Per Year: 1

Program Length: 3 Years

Specialty Certification: ACGME and ABOG

Program Description: The educational objectives of the program are to provide comprehensive training in all areas of female pelvic medicine and reconstructive surgery, as well as mentorship in research and education. Fellows receive experience through an extremely large clinical volume of patients, managed both medically and surgically. Medical management includes physical therapy, pharmacologic treatments and the use of pessaries and other non-surgical interventions (i.e. Botox). Surgical management includes a wide variety of procedures performed abdominally, vaginally, laparoscopically, and robotically.
