From Good to Great: IUGA Virtual Surgical Masterclass

We are thrilled to invite you to be a part of the 1st Edition of the **IUGA Virtual Surgical Masterclass** on March 13-14, 2026. This new program will build on the success of our in-person Surgical Masterclass sessions during the IUGA/EUGA Joint Annual Meeting in Barcelona in 2025 and were widely recognized as the most valuable sessions of that meeting.

“Catherine Matthews and Peter Rosenblatt were absolutely outstanding in the surgical masterclasses. They presented the procedures and key points with excellent clarity, supported by high-quality surgical videos. I left their sessions having genuinely learned new tips and tricks.”- Evaluation from the 2025 IUGA/EUGA Joint Annual Meeting

The IUGA Virtual Surgical Masterclass is an initiative of the IUGA Surgical Committee. Both this program and the Committee itself are co-chaired by world renowned experts Catherine Matthews and Mark Walters. Capitalizing on decades of experience in both surgery and surgical training, the Committee has put together an unparalleled program including more than 15 world experts in urogynecological surgery.

Building on the hugely successful Surgical Masterclass Program in Barcelona, this new virtual surgical masterclass aims to:

- Reinforce the principles of reconstructive vaginal native tissue surgery for the correction of more complex prolapse cases including large anterior and posterior compartment prolapse and procidentia;
- Improve the recognition and surgical management of chronic perineal trauma;
- Share best practice principles for stress incontinence management without mesh including urethral bulking and robotic Burch colposuspension;
- Discuss the surgical management of recurrent prolapse after sacral colpopexy;
- Demonstrate how to manage complications related to midurethral sling and other continence surgery, transvaginal mesh procedures, bladder injury and hemorrhage.

The virtual meeting will take place over 2 consecutive days, with 4 hour sessions scheduled each day to accommodate global participation with ample time for faculty questions after each talk. The online format will guarantee that access is available to attendees, regardless of their location or financial ability to travel. Additionally, recordings of the talks and question sessions will be made available to all participants so the information shared can be viewed at their convenience and is not dependent on time zone.
