Institution Name: University of Chicago, North Shore University Health System

Address: 9650 Gross Point Road, Suite 3900, Skokie, IL 60076
Telephone: +1 847-570-2520
E-mail: agafni-kane@northshore.org

Program Director: Adam Gafni-Kane, MD
Program Faculty: Sonia Dutta, Adam Gafni-Kane, Roger P. Goldberg, Peter K. Sand, James Spitz (colorectal), Peter Colegrove (urology), Sangeeta Senapati (minimally invasive surgery)

Trainees Per Year: 1
Program Length: 3 years

Specialty Certification: ABOG, ACGME
Special Interest Areas: Pelvic organ prolapse, urinary incontinence, overactive bladder, interstitial cystitis/pelvic pain, clinical research.

Program Description: The University of Chicago (NorthShore) Female Pelvic Medicine and Reconstructive Surgery fellowship offers an excellent opportunity for graduates of residencies in obstetrics & gynecology who are interested in pursuing a career in academic urogynecology. This 3-year accredited "fellow-centered" fellowship program in Female Pelvic Medicine and Reconstructive Surgery has both a national and international focus with fellows presenting abstracts at numerous national and international meetings including the ICS, IUGA, AUGS, SGS, SOFU, ACOG, AAGL and AUA. The fellows receive an outstanding clinical, surgical and academic education. Four attending urogynecologists work closely with the Division of Colorectal Surgery, Minimally Invasive Surgery and Pelvic Pain and the Department of Urology in educating the fellows as part of our comprehensive integrated pelvic health center. Fellows act as primary surgeons, primary investigators and first authors on the majority of all activities in the Division. Typically, our fellows publish 4-6 articles during their fellowship and many have won recognition for best papers at numerous national and international scientific meetings.
