

IUGA Fellowship and Observership Host Site Directory

AUSTRALIA

Program Director: Salwan Al-Salihi, MB, BS, FRANZCOG, CU
The Royal Women's Hospital 20 Flemington Road Parkville, Melbourne 3052 Australia
Telephone: 61-3-8345-2010 Fax: 61-3-8345-2010 Email: salihi@bigpond.au Website: www.thewomens.org.au/health-professionals/health-professionals-gynaecology/pelvic-floor-unit
Clinical and/or research activities offered: <p>The Royal Women's Hospital Pelvic Floor Unit consists of a multidisciplinary team that provides care for women with a variety of pelvic floor conditions including but not limited to urinary incontinence, pelvic organ prolapse, mesh complications and lower bowel problems. Clinically, the candidate would have exposure and access to specialty urogynaecology and perineal clinics (including 3D and 4D pelvic floor ultrasound) in addition to exposure to mesh ultrasound.</p> <p>Research is robust and fostered at the Women's. The department has been fortunate to have been awarded with multiple institutional specific, urogynaecologic societal and national funding awards in the recent past. All Pelvic Floor Unit faculty members participate in research, where projects have been presented nationally and internationally.</p>
Areas of special interest and local facilities: <p>Novel and innovative conservative and surgical management of pelvic organ prolapse and urinary incontinence, mesh complications, recurrent urinary tract infections, urinary microbiome, vaginal microbiome, perineal care, mesh 3D and 4D ultrasound, development of new practice guidelines and clinical research.</p>
Special Requirements: <p>Observerships (variable lengths of time) and fellowships (1-2 years) available</p>
Estimated length of time to complete the process of fellowship/observership approval at institution: <p>1-3 months</p>
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? <p>Yes</p>
Fellows accepted: Yes
Observers accepted: Yes

Program Director: Prof. Peter Dwyer, MB, BS, FRANZCOG, CU
Mercy Hospital for Women Burgandy Rd Heidelberg Melbourne, Australia
Telephone: 61-3-94162469 Fax: 61-3-94162472 Email: pdwyer@hotmail.net.au Website: http://www.mercy.com.au/

Clinical and/or research activities offered: Diagnosis and treatment of disorders of the female lower urinary tract and pelvic floor
Areas of special interest and local facilities: Multidisciplinary treatment of urinary and fecal incontinence. Prospective randomised studies.
Special Requirements: Fellowship 2 years medical registration in Australia; hands on observerships 1-6 months
Estimated length of time to complete the process of fellowship/observership approval at institution: 1-2 months
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? Yes
Fellows accepted: Yes
Observers accepted: Yes

Program Director: Anna Rosamilia, MD
Monash Health c/o Suite 8 Cabrini hospital, 83 Wattletree Rd Malvern 3144 Victoria, Australia
Telephone: 61-3-9509-6500 Fax: 61-3-9509-6376 Email: annarosamilia@urogyn.com.au Website: http://www.southernhealth.org.au
Clinical and/or research activities offered: Multidisciplinary Pelvic Floor Unit in public and private setting.
Areas of special interest and local facilities: RCT's sling and POP surgery; including 3D US assessment. Close collaboration with Monash University/MIMR/CSIRO POP tissue engineering; shared research projects with Mercy Hospital for women.
Special Requirements: Current overseas fellowship available Dec 2015. Long preparation period including visa/medical board registration and English test (IELTS) requirement. No salary but some remuneration may be available via private surgical assisting
Estimated length of time to complete the process of fellowship/observership approval at institution: 2 years for fellowship preferred. Observership at candidate's discretion depending on availability
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? Basic accommodation available near hospital or university can be obtained at market rates.
Fellows accepted: Fellowships not available until 2023
Observers accepted: Yes

Program Director: Ka Lai (Clara) Shek, MBBS, PHD, FHKCOG, FHKAM (O&G), FRCOG, FRANZCOG
Liverpool Clinical School 75 Elizabeth Street Liverpool, NSW 2170 Australia
Telephone: 612 8738 5300

<p>Fax: 612 8738 8035 Email: shekkalai@yahoo.com.hk Website: www.swslhd.health.nsw.gov.au</p>
<p>Clinical and/or research activities offered: Pelvic Floor Clinic and Perineal Clinic on Mondays (pm) and all day Thursdays. Five all day urodynamic clinics every 4 weeks where visiting scholars will have opportunities to perform hands on training. Research projects to study associations between pelvic floor functional anatomy and pelvic floor dysfunction.</p>
<p>Areas of special interest and local facilities: Pelvic floor imaging, effects of childbirth on the pelvic floor structure and function, imaging of meshes and slings used in pelvic floor reconstructive surgery. Facilities to perform transperineal ultrasound imaging in all clinics. Local facilities including computers, softwares for post processing of ultrasound volume data and statistical softwares are available to support visiting scholars undertaking research projects.</p>
<p>Special Requirements: Need to meet and fulfill the visa requirement and to obtain an observership status with Liverpool Hospital with the assistance of the hospital's administrative staff.</p>
<p>Estimated length of time to complete the process of fellowship/observership approval at institution: 6-9 months</p>
<p>Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? We can try to provide information on accommodation.</p>
<p>Fellows accepted: Yes</p>
<p>Observers accepted: Yes</p>

BRAZIL

Program Director: Leonardo R. P. S. Bezerra
Maternidade Escola Assis Chateaubriand da Universidade Federal do Ceará Rua Coronel Nunes de Melo, s/n - Rodolfo Teófilo, 60430-270 Fortaleza – CE, Brazil
Telephone: +55 (85) 3366-8502 Fax: +55 85 3224 5544 Email: leonardobezerragineco@gmail.com Website: http://www.ebserh.gov.br/web/meac-ufc
Clinical experience/scientific record of host site: Professor of Superior Teaching of the Federal University of Ceará, Department of Maternal and Infant (2014) I. Professor of Graduate in the Federal University of Ceará Surgery. It is currently Supervisor of the Medical Residency in Obstetrics and Gynecology, Maternity School Assis Chateaubriand the UFC. Holds the position by the Care Management Health, Hospital, Maternity School Assis Chateaubriand, the Federal University of Ceará, affiliate Ebserh. He was a member of the Teaching and Evaluation Committee FEBRASGO-AMB. He has a PhD in Health Sciences (Gynaecology) (2006) and Master of Health Sciences (2002) both from the School of Medicine of the Federal University of São Paulo with specialization in Urogynecology and Vaginal Surgery. Degree in Medicine from the Federal University of Ceará (1995) and Medical Residency in Obstetrics and Gynecology, Federal University of Ceará (1999). Specialist degree in Obstetrics and Gynecology TEGO (1999) and Practice Certificate in Urodynamics and urethrocytoscopy (2001). He has experience in Medicine, with emphasis on Gynaecology and Obstetrics, acting in Urogynecology and pelvic floor dysfunction, minimally invasive Gynecologic and Laparoscopy, Vaginal Surgery, Endometriosis, geital Prolapse, female urinary incontinence, urodynamics female
Clinical and/or research activities offered: Urogynecology service and pelvic floor dysfunction with a multidisciplinary team. We offer outpatient visits and conducting female urodynamics, pelvic floor physiotherapy to electrotherapy techniques and muscle training for the pelvic floor muscles. We performed surgical procedures for the treatment of disorders of the pelvic floor and the vaginal Laparoscopic route. We conducted Slings, sacrospinous fixation, laparoscopic promontofixação, work with prostheses, among others. We are the leading regional center of reference for the treatment of urinary incontinence, genital prolapse using prosthesis and native tissues. Furthermore we are also references in the treatment of chronic pelvic pain and deep endometriosis with laparoscopy and coloproctologics procedures for treatment of endometriosis.
Areas of special interest and local facilities: Surgical procedures for the treatment of disorders of the pelvic floor and the vaginal Laparoscopic route Pelvic floor physiotherapy to electrotherapy techniques and muscle training for the pelvic floor muscles Treatment of chronic pelvic pain and deep endometriosis with laparoscopy and coloproctology procedures for treatment of endometriosis
Special Requirements: Training in medical residence of Gynecology and Urology, some expertise for laparoscopic procedures.
Estimated length of time to complete the process of fellowship/observership approval at institution: The ideal estimated length of time would be four weeks. The minimum time will be four to eight weeks and may last up to 6 months, depending on interest and availability of the fellowship / observership
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?

Our hospital does not offer lodging but as it is located in a neighborhood where many students living there, there is wide availability of hotels and hostels nearby. If the fellow interested in getting the sea, as in Iracema Beach, or in downtown, there is Metro and Bus transport very close

<p>Clinical experience/scientific record of host site: Gynecology and Obstetrics department of University of Valparaiso, which is a public institution of higher education. The clinical campus corresponds to the Department of Obstetrics and Gynecology of Carlos van Buren Hospital, with a number of beds of 21 and 80 gynecologic surgeries per month.</p>
<p>Clinical and/or research activities offered: The program has five theoretical modules that are made online and a clinical-surgical internship of two weeks.</p>
<p>Areas of special interest and local facilities: Ginecológica and Urológica surgery, Pelvic Floor Unit, Urodynamics, open and close medical attention.</p>
<p>Special Requirements: College degree, specialist degree, personal interview (online) and resume</p>
<p>Estimated length of time to complete the process of fellowship/observership approval at institution: The estimated period to complete the application process is two weeks since the personal interview (online).</p>
<p>Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? Yes, we can guide the applicants with accommodation near the institution when they do the internship.</p>
<p>Fellows accepted: Yes</p>
<p>Observers accepted: No</p>

FRANCE

Program Director: Michel Cosson, MD, PhD
University Hospital Lille Hospital Jeanne de Flandres, Avenue Avinee Lille, France 59037
Email: michel.cosson@chru-lille.fr
Clinical experience/scientific record of host site: Vaginal surgery for POP and GSI with and without meshes, laparoscopic sacropexies clinical research on vaginal and laparoscopic pop surgeries
Clinical and/or research activities offered: Assist to the surgeries in the OR, multidisciplinary meetings for difficult cases every 2 weeks, assist to dynamic MRI, urodynamics, perineal sonography
Areas of special interest and local facilities: Fundamental research on biomechanical modelization of female pelvic cavity
Special Requirements: For a fellowship, the diploma must be recognized by France to be able to assist and perform surgeries Observership is less than 2 months
Estimated length of time to complete the process of fellowship/observership approval at institution: Fellowship : 6-12 months Observership : 1 to 2 months
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? Possible to rent a room in the hospital
Fellows accepted: Yes
Observers accepted: Yes

IRELAND

Program Director: Professor Barry O'Reilly
Cork University Maternity Hospital Wilton Road Cork, Ireland
Telephone: +35321 6013387 Fax: +353214344535 Email: barry.oreilly@ucc.ie Website: http://www.cuh.hse.ie/our_services/clinical_services/cork_university_maternity_hospital/
Clinical experience/scientific record of host site: The department of urogynaecology is led by Professor Barry O'Reilly with 2 other consultant colleagues Dr. Suzanne O'Sullivan and Ms. Orfhlaith O'Sullivan. We offer broad experience in all facets of urogynaecology and pelvic floor reconstructive surgery including simple and complex urodynamics, anal manometry and 3D endoanal ultrasound, a large surgical throughput with transvaginal, abdominal and robotic surgery (a dedicated robot for the gynaecology department). We are an accredited subspecialty training centre by EUGA.
Clinical and/or research activities offered: We have a strong track record in clinical and basic science research and have fostered strong collaborations within Ireland, Europe and Australia. There are many research opportunities for prospective fellows and we encourage all fellows to complete a research project for publication if not for a higher degree.

<p>Areas of special interest and local facilities: Our subspecialty training program (EUGA approved) combines a full training in urogynaecology and pelvic floor reconstructive surgery with relevant aspects of urology and colorectal surgery. We are an approved European epicentre in gynaecological robotic surgery</p>
<p>Special Requirements: Enthusiasm and research interest. Must comply with requirements for registration with the Irish Medical Council.</p>
<p>Estimated length of time to complete the process of fellowship/observership approval at institution: Observership can be for up to 3 months and fellowship from 1 year or 2-3 years for subspecialty training (this is a funded/ salaried position)</p>
<p>Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? The accommodation office at University College Cork will facilitate this.</p>
<p>Fellows accepted: Yes</p>
<p>Observers accepted: Yes</p>

ISRAEL

<p>Program Director: Gil Levy MD, FACOG</p>
<p>University Assuta Hospital, Ashdod, Israel Ben Gurion University, School of Medicine</p>
<p>Telephone: +972-72-3398423, +972-52-3430545 Email: gille@assuta.co.il Website: https://www.assutaashdod.co.il/</p>
<p>Clinical and/or research activities offered: The Fellowship/Observership is flexible in length between 6 weeks to 6 months. The program offers a comprehensive approach to clinical evaluation and management of women with disorders of the pelvic floor including urinary and fecal incontinence, pelvic organ prolapse, defecatory dysfunction and voiding dysfunction. Surgical management emphasizes vaginal and minimally invasive approaches. The unit is fully computerized, and the data base provides many unique research opportunities. The hospital was opened in November 2017 with state-of-the-art equipment and serves as a tertiary referral center for pelvic organ disorders. Our division treats a unique large community with high average parity causing high rate of pelvic floor dysfunction pathology. Urogynecological problems including severe urogenital prolapsed, urinary and fecal incontinence, chronic pelvic pain and other lower urinary tract disorders. The Division provides all diagnostic and therapeutic options including physical therapy, non-surgical treatment, sacral neuromodulation and surgery (vaginal, abdominal and laparoscopic). The Teaching Team includes two urogynecologists, a colorectal surgeon, a urologist and a pelvic floor physiotherapist.</p>
<p>Areas of special interest and local facilities: Apart of the large of volume of clinical activities, clinical research in the field of pelvic organ prolapse, quality of life, sexual function and urinary incontinence is supported.</p>
<p>Special Requirements: Basic knowledge of English is important for the daily clinical work with staff and patients.</p>
<p>Estimated length of time to complete the process of fellowship/observership approval at institution: 6 months</p>
<p>Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?</p>

Currently the hospital cannot provide lodging but will help in securing reasonably priced accommodation near the hospital.

Clinical experience/scientific record of host site:

Multi-disciplinary unit with excellent Urogynaecological, Urological and Colo-rectal exposure. We also have an excellent working relationship with our physiotherapy Department. Extensive experience in the full range of vaginal and laparoscopic pelvic floor surgery. Our unit is actively involved in IUGA and has presented our research at IUGA meetings and we have published in the IUGA journal.
Clinical and/or research activities offered: Broad range of exposure to all aspects of Urogynaecology.
Areas of special interest and local facilities: We have established an excellent Urogynaecological service in a developing country and IUGA fellows will benefit from our local expertise in overcoming challenges of working in a resource poor setting.
Special Requirements: None
Estimated length of time to complete the process of fellowship/observership approval at institution: 6 months
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? Yes
Fellows accepted: Yes
Observers accepted: Yes

TAIWAN

Program Director: Professor Tsia-Shu Lo, MD
School of Medicine, University of Chang Gung Division of Urogynecology, Chang Gung Memorial Hospital, Northern Taiwan Campus (Keelung, Taipei & Linkou), Taiwan, R.O.C. 5, Fu-Hsing Street, Kwei-Shan, Tao-Yuan City, Taiwan 333
Telephone: (886-3)-3281200, ext 8258 Fax: (886-3)-3288252 Email: 2378@cgmh.org.tw Website: http://www.chang-gung.com/en/doc-info.aspx?rows=8&page=2&id=1188&bid=6
Clinical experience/scientific record of host site: The Urogynecology Division of the Department of Obstetrics and Gynecology, Chang Gung Hospital was established in 1996. It has published more than 150 SCI articles, conducted more than 30 research projects, and recruited more than 27 foreign doctors for urogynecological training in past 10 years.
Clinical and/or research activities offered: Out-patient clinics, urodynamics, pelvic ultrasound, physiotherapy, out-patient cystoscopy, Botox intra-vesical therapy and pelvic reconstructive surgery (vaginal, laparoscopic and robotic). Basic science and animal research center.
Areas of special interest and local facilities: The northern hospital campus consists of three hospital training sites. It offers out-patient clinics facility, urodynamics lab, physiotherapy center, ultrasonography lab, out-patient cystoscopy center and animal research study lab.
Special Requirements: Good level of English. Clinical fellowship applicants need to comply with Taiwan Medical & Health Regulation.
Estimated length of time to complete the process of fellowship/observership approval at institution: Clinical & Research Fellowship: one year, minimum Observership: 4 weeks minimum
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?

Hospital lodging is provided.

<p>Clinical experience/scientific record of host site: Team of 3 urogynaecologists provide extensive opportunities for clinical and surgical work and research. RCOG Subspecialty training centre. BSUG-accredited unit for clinical service</p>
<p>Clinical and/or research activities offered: Out-patient clinics including perineal/joint clinic with colorectal surgeons (2 per month) and joint clinics with urologists (every 2 months), urodynamics, conservative treatment experience, physiotherapy, tibial nerve and sacral nerve root stimulation, out-patient intravesical Botox and urethral injectables/bulking, Nurse-led pessary clinics. Midwife-led OASI clinic. Work closely with colo-rectal colleagues with regular MDT meetings to review complex cases and proctograms and with pain management team for vaginal/pelvic pain patients. Anorectal physiology investigation including manometry and endoanal ultrasound by Colorectal nurse specialist and consultant. Surgery: full range of urogynaecological procedures offered including laparoscopic sacrocolpopexy. Participation in clinical trials e.g. prolapse surgery, obstetric anal sphincter injury and maternal birth trauma, drug trials.</p>
<p>Areas of special interest and local facilities: Maternal Birth trauma including Obstetric anal sphincter injury prevention; prolapse surgery; facilities include dedicated out-patient lab for urodynamics and conservative treatments.</p>
<p>Special Requirements: Will need limited registration with the UK General Medical Council. No funding available for accommodation.</p>
<p>Estimated length of time to complete the process of fellowship/observership approval at institution: Variable depending on the experience of the trainee.</p>

Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?
Yes
Fellows accepted: No
Observers accepted: Yes

Program Director: Raneethakar, MB.BS, MD, FRCOG; Abdul Sultan, MB.CHB, MD, FRCOG; Dalia Saidan, MRCOG
Croydon University Hospital Urogynecology and Pelvic Floor Reconstruction Unit 530 London Road, Croydon, Surrey CR7 7YE UK
Telephone: *44 208 401 3161 Email: raneethakar@gmail.com; asultan29@gmail.com Website: www.perineum.net
Clinical experience/scientific record of host site: <ul style="list-style-type: none"> • Subspecialty accredited unit with high volume academic output, multiple research opportunities and passion for teaching and training. • Expert multidisciplinary center for the assessment and management of pelvic floor dysfunction offering full range of pelvic floor reconstructive and incontinence surgery via the abdominal, laparoscopic and vaginal route. • A leading international unit for the imaging of the pelvic floor and the diagnosis of mesh related complications following prolapse and incontinence mesh surgery.
Clinical and/or research activities offered: An observer will gain exposure to a multidisciplinary, high quality and evidence-based approach to the management of complex urogynaecological cases. The candidate will attend specialist urogynaecology clinics, dedicated postpartum one stop clinic and obtain insight into the evaluation of peripartum anorectal function including endoanal manometry, endoanal ultrasound, 2D and 3D pelvic floor ultrasound. There will be a unique opportunity to observe the use of different modalities to pelvic floor ultrasound for the assessment and diagnosis of mesh related complications and pelvic organ prolapse. In addition to full participation in the unit's clinical activities, a fellow will be supported to complete a research project.
Areas of special interest and local facilities: In addition to general urogynaecology, the unit is renowned for its expertise in childbirth related pelvic floor trauma, female sexual dysfunction and disorders related to the posterior compartment. The services are provided in a dedicated unit which has facilities to perform conventional and complex urodynamic studies, pelvic floor and anal sphincter ultrasound and anorectal manometry.
Special Requirements: General Medical Council (GMC) Registration is mandatory for a fellowship programme. Observership does not require GMC registration
Estimated length of time to complete the process of fellowship/observership approval at institution: Fellowship - at least 12 months Observership – between 2 to 6 weeks
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?
Reasonably priced accommodation on the hospital campus may be possible subject to availability
Fellows accepted: Yes

Program Director: Douglas Tincello, MD, & Rod Teo, MD
University Hospitals of Leicester NHS Trust Leicester General Hospital, Gwendolen Road, Leicester LE5 4PW UK
Telephone: +44 116 2525451 or +44 116 2588391 Email: dgt4@le.ac.uk
Clinical experience/scientific record of host site: Leicester hosts one of the most established tertiary referral Urogynaecology centres in the UK; we have trained five subspecialists in the UK and have internationally recognized research output.
Clinical and/or research activities offered: The unit runs three urogynaecology clinics per week with at least three operating sessions per week. All procedures are performed, including midurethral tapes (pending the UK mesh pause) and colposuspension for incontinence, vaginal reconstructive surgery, and sacrocolpopexy (open and laparoscopic). Sacral nerve stimulation and botulinum toxin are offered. There are established multidisciplinary clinics with both urology and colorectal surgery which run on a monthly basis. Research activity is predominantly clinical.
Areas of special interest and local facilities: Leicester is one of Britain's most culturally diverse cities, with a large Asian Indian (Gujarati) population, and significant minorities of African peoples, Afro-Caribbeans, and Eastern Europeans. Leicester is about an hour from central London and the Peak District, Sherwood Forest and Birmingham are all close. Leicester has several important tourist attractions: the National Space Centre, New Walk Museum (Roman artifacts), and of course the burial place and bones of Richard III. Leicester Tigers Rugby club and Leicester City Football club form part of the sporting heritage of the city.
Special Requirements: Various documentation will be required in advance: CV Proof of eligibility to undertake the placement/work in the UK (e.g. copy of passport with valid visa; there may be additional requirements depending on which country candidate is from) Overseas local police report (for child protection/previous convictions) GMC clearance may be required
Estimated length of time to complete the process of fellowship/observership approval at institution: Up to three months for observerships; Fellowships may be offered on request, depending if someone is already in post.
Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution? It may be possible to secure hospital accommodation for the duration of the observership, although married accommodation is in short supply. We can assist in the search but cannot cover the cost of accommodation.
Fellows accepted: On request

Clinical experience/scientific record of host site:

The urogynaecology department at Addenbrookes hospital has two dedicated Consultant urogynaecologists, my colleague Dr. Ivilina Pandeva and myself. I am a subspecialist fellowship trained urogynaecologist having trained at Cambridge university hospital. We have a high quality tertiary urogynaecology service offering treatment of primary and recurrent urogynaecological conditions and a twice monthly MDT for complex cases. We have ongoing active clinical research projects and we work closely with our colorectal and urology colleagues and have facilities for conventional and video urodynamics and a dedicated ambulatory urogynaecology clinic. We perform a wide range of vaginal, laparoscopic and open abdominal procedures for prolapse and urinary incontinence and also run monthly clinics for patients with obstetric anal sphincter injuries after childbirth including endoanal ultrasound scanning. Our unit also has a successful and much sought after urogynaecology subspecialty fellowship training programme. Our unit is also one of the 8 nationally commissioned mesh removal centres in the UK.

Clinical and/or research activities offered:

We perform 300 prolapse and incontinence procedures annually including laparoscopic sacrocolpopexy/hysteropexy and sacrospinous fixations, colposuspension and autologous fascial sling. We also perform total laparoscopic hysterectomies for patients without prolapse. We have a dedicated ambulatory unit where we perform outpatient cystoscopies, paraurethral injections and intravesical botox twice monthly. We offer conventional and video urodynamics and we have a dedicated MDT twice monthly to discuss complex cases which is well attended by clinicians including urologists, colorectal specialist and physiotherapist, urogynaecology nurse specialist and continence advisors.

We have a monthly perineal clinic for managing childbirth related urogynaecological conditions including fecal incontinence and we offer bladder instillations for PBS/IC.

We have an active clinical research programme. We have an active R&D department with support of a research nurse and library facilities for literature search and statistical support.

The candidate will get very good exposure to laparoscopic sacrocolpopexy and sacrospinous fixation procedures, urodynamics, dedicated urogynaecology and perineal clinics and MDT.

Areas of special interest and local facilities:

Cambridge is a world class University and the town is centered around the university colleges and very picturesque. London is within easy commuting distance. Addenbrookes hospital and the biomedical campus is a world renowned medical and research institution. The range of urogynaecology conditions treated and the management options offered in our unit cover all the current available treatment options.

Special Requirements:

None

Estimated length of time to complete the process of fellowship/observership approval at institution:

8-10 weeks

Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?

Lodging at current market rate may be available onsite via medical staffing department. Cambridge being an university city, there is a large variety of student lodging also available via letting agents.

Website: www.urogynecologist.com

Clinical experience/scientific record of host site:

Integrating a global perspective within the section of FPMRS requires input from a number of sources such as study/travel experiences for faculty to learn about the world, as well as an integration of international content within the curriculum or through interactions with international researchers. Another way is to host international researchers who share their life and work experiences with us. The Research Scholar Program provides such an experience for our program as well as the visitors. The Research Scholar Program is open to practicing physicians, educators, or basic scientists who wish to come to INOVA Fairfax in Washington DC area and study with on-site faculty mentors in the section of FPMRS. The scholars may come to learn and perform research on 3d Pelvic floor ultrasonography or perform other basic science research conducted within our section. If you are an international research scholar, your J1 visa will not allow you to have any patient contact. These scholars will provide learning objectives for their time in residence and the International office will assist them with a J-1 visa, finding suitable housing and transportation, office space and access to facilities such as the library. No certificate is awarded. We do not assess a fee and the scholar will not be paid. This will be a rigorous program for those who intend to perform extensive research and publication. Three weeks of vacation per year is permitted. The scholar should come with own funding. A grant from the International Urogynecologic Association (IUGA) www.iuga.org is an option. The length of study can vary from 6 months to 2 years depending on your level of expertise. Interested applicants need to fill an application as posted on our site at <http://urogynecologist.com/fellowship/researchscholarprogram.html>.

- 1) We will put them in touch with the immigration officers for J1 visa processing.
- 2) They will need to complete on-line citi research training, and on-site training upon arrival to INOVA.
- 3) A complete knowledge of Microsoft, database building, and SPSS/SAS database processing or statistics will be helpful.

Clinical and/or research activities offered:

Anatomy, Imaging, 3D Ultrasound, Biomedical Engineering, Biomechanics

Areas of special interest and local facilities:

Special Requirements:

Complete fluency in English. Ability to write technical manuscripts. MD, PhD, PT, Sonographers are accepted. A personal statement detailing the scholar's goals along with their CV, 3 letters of recommendation and application form is required.

Estimated length of time to complete the process of fellowship/observership approval at institution:

Generally pretty quick. The visa processing is the time consuming part of the process.

Can the host site provide lodging or help the fellow/observer secure reasonably priced lodging near the institution?

We can try. Washington DC is a relatively expensive area to live in, but the hospital is about one mile away from the local Metro station. Arrangement for housing and transportation is the sole responsibility of the individual. There is an Extended Stay America hotel within walking distance of the INOVA Fairfax Hospital.
