<i>Trainees Per Year:</i>	2
<i>Program Length:</i>	2 years
<i>Specialty Certification:</i>	Board eligible for FPMRS boards
<i>Special Interest Areas:</i>	Robotic surgery, complex urogenital reconstruction, complex mesh removal
<i>Program Description:</i>	<p>The goal of this 2 year training program is to train the future leaders in the field of female pelvic medicine and reconstructive surgery. Fellows are taught the surgical and methodological skills to become highly-skilled pelvic surgeons and independent scientist/investigators. Fellows will experience intensive and broad-based clinical, surgical, and research experiences with progressive responsibility during the two-year training program. The program offers exposure to a wide spectrum of female and male surgical procedures. On average fellows perform a total of 500 surgeries per year. These surgeries include:</p> <ul style="list-style-type: none"> • Female and male incontinence • Female pelvic organ prolapse repairs • Open abdominal reconstructive surgery • Laparoscopic and robotic pelvic reconstructive surgery • Genitourinary fistulas • Urethral reconstruction • Mesh complications/removals • Neurogenic voiding dysfunction • Spinal Cord Injuries
