Workshop

February 26th, 2019

Cipto Mangunkusumo General Hospital, Jakarta

1. Smart Pelvic and CNS for Obstetric
Using Ultrasonography device introduced by Mindray, we want to give the knowledge about smart pelvic application, to find and to diagnose women with pelvic organ prolapse or with urinary incontinence, and to give the experience of how easy to set up and using the USG device. Not to mention the USG can be also use in obstetric patients.
2. MSD Workshop
“Good research comes from a great method” - Working with Sopiudin Dahlan; a Consultant in Statistic, Research Proposal Writing and Good Clinical Practice; we want to give knowledge about writing and making a good quality research. Through this workshop, participant can discuss about his/her ongoing research or to discuss about the making of research proposal.
3. Pelvic floor Anatomy for Safe Pelvic Floor Surgery - Video Session on cadaver
With lectures form international speakers, Christopher Barry will guide us who wishing to understand important anatomical landmarks in relation to incontinence and pelvic floor prolapse surgery.
4. Urodynamic workshop (to be confirmed)
One of the most important examination to do in urogynecology is urodynamic, to diagnose the type of urinary incontinence, but many of us still thinks that urodynamics is a complex subject. Through this workshop, we will guide you to have a good experience and to see the tips and trick on operating the machine.
5. Nurses workshop (Urine Retention Prevention)
